

INSTRUCTION SHEET

Instructions for preparation of tumour tissue for transport to the IOZK

We kindly ask you to read the following instruction contents and confirm with your signature that you have understood them.

Contact the IOZK logistics department and inform about what pick-up time is convenient for you.

IOZK logistics: **Logistics@iozk-lab.de**

Make sure that the container in which the tumour is cryconserved is water-resistently labeled with name and date of birth of the patient.

The tumour material extracted in vital condition must be cryconserved without addition of cryoconserving substances as e.g. DMSO or formalin.

The tumour material should be stored at -80 C° until pick up by World Courier.

Hand over the cryoconserved tumour material with this form [1] and form [2] to **World Courier**.
