INSTRUCTIONAL SHEET

Instructions in accordance with the pharmaceutical law for extraction of tumour tissue and organization of transport to the IOZK

We kindly ask you to read the following instructional contents and confirm with your signature that you have understood them.

Put a water resistant tag with the patient's name and date of birth on the sterile plastic container to receive the tumour material.

Secure a representative, vital section of the tumour tissue with minimal necrotic portion. **Minimal size: 1,5 cm^3**.

Do **not add any liquid** or conservant such as DMSO, formalin etc.

Store the plastic container at -20 to -80 C° until pick up by World Courier.

Hand over the plastic container with this form [1] and form [2] to World Courier.
